

Help Students Prep for the WASL with DLC Resources

WASL Review and Refresher courses are designed to help prepare students for specific portions of the WASL. Save on these online courses by purchasing them through the DLC.

Apex Learning ClassTools are developed by experienced instructional designers and subject matter experts to align to state and national standards. English, Math, and Science ClassTools can help students master subjects covered in the WASL.

Mathcasts is a screencast tool for students and teachers which correlates to Washington math standards and WASL preparation. More than 40 problems in eight categories create a thorough review for 9th and 10th grade students.

DLC Library databases can help students prepare for the WASL. Grolier's lesson plans are aligned to state standards. And both netTrekker d.i. and SIRS link to resources that support state standards.

Online credit recovery courses can help students quickly make up missed credits and get up to speed with state standards. Browse the list of credit recovery courses in the course catalog.

ALP WASL Prep assists students as they review and practice math and reading skills covered in the WASL. ALPs Math is designed for middle and high school students, and ALPs Reading is designed for middle school students.

ExploreLearning Gizmos offer interactive modules that bring complex mathematical concepts to life. Students solve equations that correlate to Washington state standards.

DLC Standards Alignment Tool helps you to search the entire DLC website for resources that meet Washington EALRs, GLEs and WASL Prep. We also provide alignment standards based on powerful teaching, OSPI initiatives, and special education.

DLC Tutors offer individualized WASL help, using the following DLC resources: ALPs, netTrekker, SIRS, Marco Polo, and ClassTools. Your students can access live, online homework help after school.
